Tools used

Jira (★★) - Issue & Project Tracking

Discord (★★★★★) - Communication and Resource Tracking

Github - (★★★★★) - Version Control

Drive - (★★★★★) - Document Management

Steam API (★★★★) - Games Library

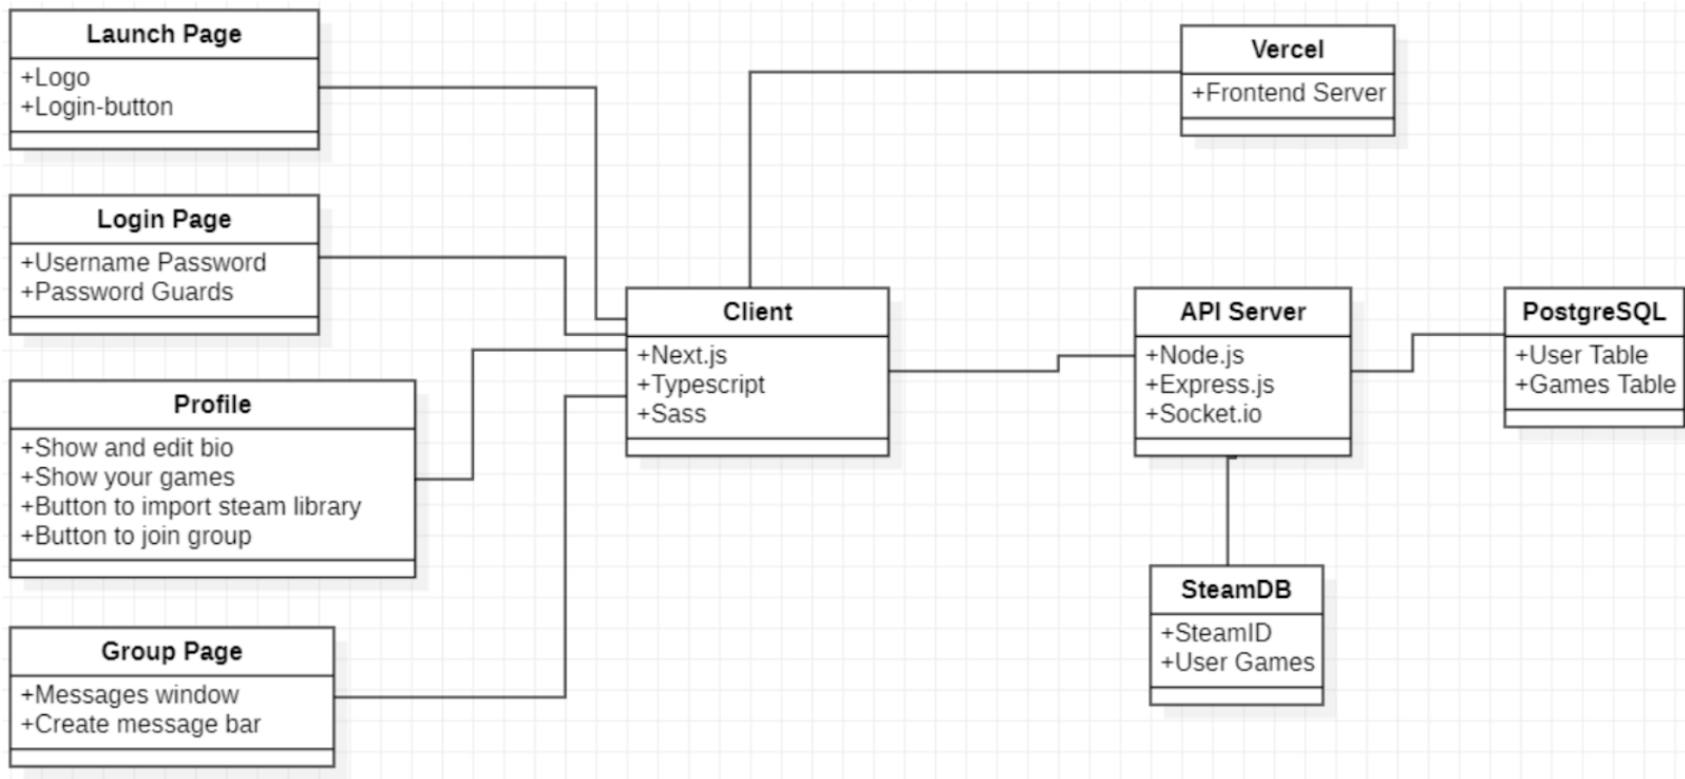

Libraries used

React - Frontend

Next.js - Frontend

Node.js - Backend

PostgreSQL - Database

Challenges

- Team size shrunk by one initially, then by two midway through the development.
- Left with a codebase not taught by the class, unfamiliar to remaining group members
- No remaining members familiar with front-end development

Solutions

- Group sessions attempting to figure out dated codebase, everyone collaborating to get things working
- Reprioritization of features

Benefits

- More time with Tzu-chi and Nikita 😍
- More front end experience for all group-members
